2. Publikus transzportáció kontra kerékpár

Public transport	**Riding a bike**
environmentally friendly	environmentally friendly
it can be fast (but not during rush hour)	bicycle lanes can be crowded
it can be crowded, especially in the morning	it can be dangerous, you can easily get injured by falling of the bike
The buses are usually old and dirty	you need to focus all the way there
you can read a book or use your phone while travelling	your bike can be stolen
you can be pick-pocketed	you are exposed to various weather conditions
there is a fix timetable	it takes you door to door
you can sit or stend	in the summer you get sweaty
the ticket and the monthly pass are very expensive	you can get a bike for very cheap nowadays

3. Miért jó olvasni
   - Reading is useful because it helps you learn new things.
   - It's the best way to kill boredom because it's not only an easy way to pass time it also a way to broaden your vocabulary
   - It's the best way to improve your focus because when you're reading a book, you only focus on one thing: the book. And if the book is very exciting it's hard to distract you from it.
   - Reading can be a great distraction from real life problems because when you read, you travel to a world which was created by the author of the book.
   - You can learn a lot of new skills while reading a book.

4. A kedvenc könyvem

   My favourite book of al time is Szent Péter esernyője by Mikszáth Kálmán.

   The story is about an old umbrella which is full of money. After the owner of the umbrella dies it gets lost and one of the inheritors tries to find it.

   The story is set in 19th century Hungary.

   All the characters are very well written, but my favourite is the main character Widra György because he is very brave, thoughtful and intelligent. Also I really like his way of thinking.

   I fell in love with the book because of Mikszáth's style of writing and because of the very lovable characters.
